

Case Study – OHSAS18001

“John is a very knowledgeable individual who delivers time and time again. He is an excellent communicator and leads from the front. During his time with us he made people feel at ease and always took time to listen. His hands on approach and the ability to sort out any problems by offering good sound advice were respected by all our staff. This proved essential when getting the workforce behind the project “

Damian Graham – Managing Director

ISO Team

Damian Graham – Engineering Manager
John Keen - RKMS

Project Objectives

To assist the company on installing a health & safety management system to BS OHSAS18001:2007.

Background

The managing Director wished to ensure that all necessary H&S precautions had been established and were effectively maintained through an effective management system.

The Managing Directors own words were “I want to make sure I can sleep at night knowing that I have done all I can to ensure the safety of my staff and the general public”

Assistance Provided

The existing system H&S provisions were assessed and a gap analysis undertaken to identify areas for improvement and an action plan developed.

Risk assessments and arrangements were further strengthened by ensuring documented procedures detailing the method of assessment and controls were introduced.

General H&S awareness and internal audit training was delivered to the Senior Management Team.

Outcomes

The company successfully achieved certification to BS OHSAS18001 seven months after the project commenced.

The company were the first Company in the UK providing public bus transport to achieve certification to the standard.

In November 2008 the Company won the highest accolade in the bus industry, UK Bus Operator of the Year.

RKMS have over 20 years experience in risk and compliance other services include, business improvement/lean management, environmental health & safety support and ISO standards implementation
